ABOUT TRI-BUILT	15

TitanGuardTM GUTTER GUARD

Available in 10' and 4' lengths, at 5" and 6" widths in both flat and step-up designs.

- Handles high water volume
- Flat perforated surface allows leaves and debris to dry and blow off
- Made of high quality aluminum – no warping
- Screws to the front and back of the gutter, as well as the fascia board, strengthening the entire gutter system
- Low profile design blends beautifully with the roof line

FLAT PROFILE

Works with spike/ferrule
& flat hidden hangers

STEP-UP PROFILE

Works with any
K-Style hanger

PRO PREFERRED DESIGN

GUTTER GUARDS

NOTE: TRI-BUILT Gutter Guards are designed to prevent leaves and debris from entering gutters, roof eaves and troughs. Product performance can vary depending on proper installation, product selection, gutter orientation, roof material and slope. Winter weather may cause snow and ice to accumulate at roof eaves. Ice damming can result from improper roof ventilation and inadequate insulation. Heat radiating from below the roof and sun radiation melt snow and it freezes again when temperatures drop below freezing. Icicles can form on roof edges due to these conditions whether or not gutters or guards are installed. This is a natural process beyond the manufacturers control and we accept no responsibility for ice and snow accumulation or related consequences. Leaf Guards are sold as debris protection devices. The manufacturer assumes no responsibility for any other result of this product use.

			Step-Up	White ()	GGTGS6W10TB	

NOTES:

- Keep debris out and allow water to flow into gutters easily with the TitanGuard™ Gutter Guard. The build-up of leaves, pine needles and other small elements can obstruct the flow of water off the roof and potentially cause damage to the wood on the edge of a roof. With an easy installation, two-step process, a TitanGuard can prevent clogged gutters while having a low-profile that blends into the roof line.
- 20-year performance warranty.

ROOF EDGE
