

TRI-BUILT® SLANT BACK ROOF VENT

OVERVIEW

We've taken the Slant Back roof vent that is known and well used in the industry, and made it better.

First, we took out the old fashioned metal screen and added a new, patent pending molded-in grill. This new code approved grill with it's unique stair step design allowed us to increase the airflow without having to increase the size of the vent, thus the vent looks better without compromising performance.

Next, we eliminate potential leaks by sonically welding the slant of the cap directly to the roof vent skirt creating a solid, leakproof bond. Finally, we made the vent using only the finest, UV and impact resistant resin. Particularly useful on steeper pitched roofs: the newly redesigned TRI-BUILT® Slant Back carries on the tradition of quality and innovation you would expect from TRI-BUILT®.

FEATURES

- Patent pending stair step screen provides more airflow in a smaller vent
- 61 sq. in. of net free area
- Ideal for pitched roofs up to 12/12
- Prevents birds from nesting
- Won't crush, dent or peel
- Cold impact resistant down to -40°
- UV resistant polypropylene
- TDI approved

SPECIFICATIONS

NET FREE AREA	DESCRIPTION	PART #	SIZE	CTN. QTY.	WT.CTN. (LBS.)
61 sq. in.	Black	88750150	17¼" x 18¼" x 4"	10	24
61 sq. in.	Brown	88750160	17¼" x 18¼" x 4"	12	24
61 sq. in.	Gray	88750170	17¼" x 18¼" x 4"	12	24
61 sq. in.	Green	88750180	17¼" x 18¼" x 4"	12	24
